3 July 19 69

MEMORANDUM FOR: Executive Director, NPIC

SUBJECT: Progress Report on Follow-up Actions to R&D Trip

1. In relation to selection of operators for the [] High Precision Stereo Comparator, DED has forwarded a memorandum to Chief, IEG citing the previous [] work on the visual factors associated with operating an instrument of this type and an offer of [] assistance to IEG in their selection of operators who have the proper visual requirements. [] and [] have developed an experimental design, using the NPIC Point Transfer Device, to determine the ability of operators to accurately place the floating dot pointer which the HPSC will have.

2. The comparative evaluation of the [] ATR optical diffraction pattern sampling technique and the electronic clue extraction technique is continuing. [] is preparing a briefing which will list and define the evaluation criteria which are being used to objectively compare the advantages and shortcomings of these two techniques. This briefing will be available on the 26th or 27th of June.
